FAMILY MUSIC

When Jerry Taylor began studies at UK in 1964, he and two high school friends started a band to earn extra money. The band, *The Marauders*, became one of the region's top acts, playing night clubs, fraternity parties and concerts. Now, years later, Jerry's grandkids have been bitten by the bug.

Ellie, 13, plays keyboards and Matthew, 10, plays guitar. They are backed by Dad, Dr. Andrew Bernard, on drums and Granddad on bass. The group (B3 & T) jams every chance they get.

ON THE BOARDS

TArc is currently finalizing plans for Phase II of the Clinton County Wellness Center. The recently completed Phase I contains the pool, locker rooms, cardio/weight room, aerobics room, lobby and offices. Phase II will contain outside features including a picnic shelter, playgrounds, basketball court, sand volleyball court, splash pool, skateboard park and maintenance facilities.

SCIENCE & ENGINEERING BUILDINGS

University science & engineering buildings, including laboratories, have long been a specialty of TArc. We believe that design plays a key role in achieving a University's aim to create a state-of-the-art center which fosters a sense of community, showcases the sciences within the campus, is highly flexible and provides an excellent environment and image in support of attracting and retaining the best faculty and students from the worldwide community.

Our design approach is driven by two primary themes-insuring that the design and planning provides a facility which participates harmoniously with its surroundings, and is simultaneously configured "from the inside out" insuring functional zoning, adjacencies and individual room layouts are provided-all of which incorporate state-of-the-art technologies and anticipate future building services, computing, new teaching styles and systems development. Examples include:

- UK Mechanical Engineering Building
- WKU Engineering & Biological Sciences Building
- WKU Snell Hall Science Building
- WKU Science & Technology Hall
- UK Chemistry/Physics Building Renovation
- UK Ag Science Research Buildings Renovation
- Department of Agriculture Petroleum & Pesticide Laboratory
- WKU Materials Characterization Laboratory
- WKU Thermal Combustion Laboratory
- WKU Applied Physics Research Laboratory
- LFUCG Waste Water Treatment Testing Laboratory
- WKU Renovation of Thompson Science Center
